

Armson Wool Store

Situated behind the Harvey Norman building in Durham St, this job including full strengthening of the three storey building and parapet. Approximately 35 tonne of steel work went into the building. Much of the work was done by hand only, with very heavy 'K' framing and bracing having to be installed into the existing building by labour only. Work was completed in 2006. For more information on this job, click here (http://www.fletcherconstruction.co.nz/project.php?project_id=373&archived=yes).
